FUNdamentals for Choir

FUNdamentals for Choir is our unique foundation program that uses an aural approach for learning to FEEL, SEE and HEAR the language of music.

Our program guides students toward a vital internalization of pulse and rhythm, correct breathing technique, intonation, and articulation of text. FUNdamentals cultivates the foundational skills for singing performance and artistry through a large quantity of children's musical literature, singing games, and collaborative exercises. Children are nurtured through play and encouraged to experience the joy of musical expression through focus, collaboration, spontaneous response and improvisation.
